FOR IMMEDIATE RELEASE

## **FLEX-ING INTRODUCES RHINO™ PIPE GUARDS AND BOLLARDS**

Sherman, TX — FLEX-ING continues its commitment to customer satisfaction and a comprehensive line of quality products through a sizeable capital investment in state of the art pipe bending equipment. The recent acquisition serves as the cornerstone to FLEX-ING's new RHINO™ line of u-shaped pipe guards and bollards and further expands FLEX-ING's already impressive line of products.

FLEX-ING's new pipe bending facility is in full production generating u-shaped pipe guards and bollards designed to protect property and avoid costly damage to fuel dispensers. FLEX-ING's pipe guards and bollards are constructed of schedule 40 steel and are delivered primer finished – ready for custom paint. Standard u-shaped pipe guards are available in 3.5" and 4.0" outside diameters in a variety of heights. Bollards are available in both 4.0" and 6.0" outside diameters in heights ranging from 42" to 84". Additional sizes are available upon request.

FLEX-ING's RHINO™ line of products also includes the durable and lightweight RHINO™ composite fiberglass manholes. The RHINO™ manhole cover exceeds H20 and HS20 standards as well as the European EN124:1994 standard. In addition to its solid core composite fiberglass and resin construction, the RHINO manhole cover comes standard with the ArmorFLEX™ powder coat finish on all rings and skirts to provide extreme protection in extreme environments.

FLEX-ING, headquartered in Sherman, Texas, USA is a leading solutions provider for the petroleum, service station equipment, hydraulic and cryogenic industries. FLEX-ING manufactures a host of applications to manage the transfer and dispense of petroleum products, ease maintenance tasks and increase safety. FLEX-ING's unique and flexible solutions cater to both major industrial distributors as well as unique industry applications.
